PROFESSIONAL PROFILE

Summary

- Full Stack Developer with experience in independent projects, specialized in React and Node.js, with a focus on modern technologies, advanced frameworks, and AI-based solutions. Passionate about technology, continuous improvement, and solving complex problems. Seeking an opportunity to grow professionally within a collaborative team, contributing efficient and scalable solutions.

Education

- Self-taught training in web and mobile development, focused on the MERN stack. Complemented by online courses in software architecture, REST APIs, NoSQL databases, and continuous deployment.

Featured Projects

Trading Platform

- Application for traders that consumes real-time APIs from multiple exchanges to dynamically display cryptocurrency data. Built with Next.js and NestJS, using PostgreSQL as the database and deployed on Railway and Vercel.

Personal Portfolio

- Website developed with Next.js and TailwindCSS to showcase projects, technologies used, and a contact form. Deployed on Vercel, focused on usability, clean design, and performance.

Other Projects

- Personal projects developed for learning purposes, where I worked on features such as API consumption, authentication, database management, interface design, and mobile app development.

SKILLS

- Frontend: React, Next.js, TailwindCSS
- Backend: Node.js, Express, APIs REST
- Databases: Firestore, MongoDB, PostgreSQL
- Deployment: Vercel, Railway, Render
- Version Control: Git, GitHub
- Other: Firebase Auth, state management, custom hooks
